GOWNS

Surgical Gown

M100006

M100006 Gown is suitable for procedures with moderate risk of exposure to non-biological fluids.

Our high-quality 40gr. / m² SMS material has spunbond-meltblown-spunbond structure. Cotton-like hand feel and breathable ability make the most comfortable option.

EN 13795-1:2019
93/42/EEC
Medical Devices Directive

M100041

Isolation Gown

M100041 Isolation Gown is designed to be used in situations where direct exposure to liquid is possible or in a humid work environment.

M100041 Isolation Gown is made from 55gr./m² breathable laminated material. Tear and abrasion-resistant material structure prevent the transmission of bacteria between the healthcare team and the patient thanks to highly protective Polyethylene layer laminated over Polypropylene layer.

Accessories

Laminated Disposable Boots

Thanks to its laminated structure, our boots provide protection in situations where liquid surfaces can be contacted. It is compatible with other medical garments - especially coveralls. There are two styles in a single size and both of them are made of 55gr./m2 breathable PP+PE laminated structure.

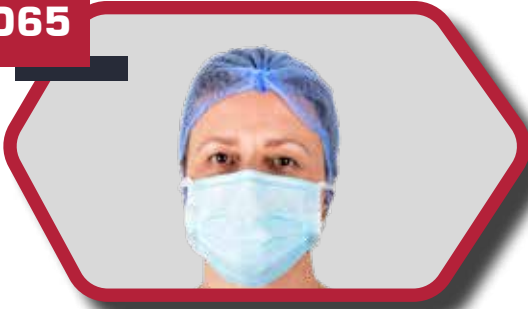

Critical Cover Sleeves

M100026 offers additional protection in areas that are most likely to be worn, damaged or threatened. The cuff, laminated material and elastic structure make it strong and durable. The size is tapered from inside to outside. It is suitable for laboratories, renovation processes, food production and light industry. Breathable ability of the material offers better comfort.
